

Rochester Aero Model Society Meeting on December 6, 2016

Site – Bowlocity

Attendees

Marv Sawyer, Jim Nordly, Jeremy Palbicki, Dave Just, Ken Rodgers, Lynn Landin, Ryan Kuisle, Bob Block, Elmer Block, Mike Norrie, Steve Brown, Leo Jaeger, Noel Taylor, Bob Harding

Old Business

- There was no old business to discuss.

Treasurer's Report

- Steve Brown presented the Treasurer's Report as of Dec. 1, 2016, the 2016 Budget vs Actual report and the Proposed 2017 Budget. All of our accounts are in good standing.

New Business

- A Work Day at the field in the spring was discussed. The timing will be determined at a later date since the weather will have to be considered. Potential projects include putting netting in the shelter to eliminate the bird problem, lowering the level of the charging station, cutting down some trees and bushes off the northwest end of the runway, augmenting the gravel on the roads, small table tops to hold equipment at the pilot stations, a sign to identify our field to passing cars and conducting a search for a lost plane.

- The club events for 2017 were discussed. The usual events of the Spring Opener, Family Day and Fall Closer were mentioned. Also discussed was a Quad-copter Day. Another idea put forth was a contact combat day if enough interest is shown. It would involve making simple foam planes like those with plans on our website.

- Jim Nordly was honored for his extensive work at the field including grounds maintenance, equipment repair and shelter maintenance. He spends many hours all season long on these tasks. We all appreciate his efforts. He refused a waiver of dues for his contributions.

Next Meeting

- The next meeting will be in the spring probably in April or May. The time and place of that meeting will be communicated at a later date.
